

## Cameron Campers Canvas

**Subject:** Cleaning your PVC - Road cover

Travel Cover and flooring material is of high grade PVC

### Looking after your PVC

Here are some basic instructions on how to take care of your PVC fabric!

Mix a weak concentration of detergent (1:20) in luke warm water.

**The detergent must not contain any solvents.**

Wet the top of the fabric with the detergent and water mix. You can apply this mixture with a soft cloth, soft-bristle brush or soft mop. After this has been completed, rinse off with plenty of fresh water until no residue remains.

For mildew: wash with liquid detergent, tepid water and diluted chlorine bleach (1:20), then rinse with plenty of fresh water until no residue remains. It is best to experiment in a non-critical area first.

**Avoid harsh rubbing or scrubbing. Any implement used must not be too hard or coarse, otherwise the surface will be damaged.**

Thank you
